|------------------------------------------------------------------------------------|------------------|
| POTASSIUM SULPHATE K <sub>2</sub> SO <sub>4</sub>                                  |                  |
| CAS 7778-80-5                                                                      |                  |
| Customs commodity code 31043000                                                    |                  |
| Chemical parameters & Physical properties                                          | Guaranteed Value |
| Mass content part of Potassium in calculation on K <sub>2</sub> O, % not less than | 50.0             |
| Mass content of Sulfur (S) in terms on SO <sub>4</sub> , %, not less than          | 51.0             |
| Mass content of Chloride in, %, not more than                                      | 1.0              |
| Fraction of total moisture, %, not more than                                       | 1.0              |

**Appearance:** A white crystalline powder with a yellowish tinge

**Packing:**

Big Bags of net weight 1000 kg +/-0.5 % on pallets.
